Mini Project

Task Management Application	
Title	Date period
<p>The task management mini project involves building a web-based application that allows users to manage tasks with basic CRUD operations. The front-end is developed using javascript for a dynamic and user-friendly interface, complemented by CSS. On the back-end, the application is powered by Node.js. The data is stored in a simple SQL database, and the back-end exposes RESTful API endpoints to handle task operations. Git is employed for version control.</p>
